Rupesh Kumawat

kumawatrupesh049@gmail.com 8209133278 Jaipur, Rajasthan rupesh.kumawat02

OBJECTIVE

B.Tech Computer Science student at JECRC University and software developer intern with hands-on experience in Python, React, Flask, Node.js and machine learning. Built and deployed full-stack projects, integrated third-party APIs, and applied data analysis and machine learning models to real datasets. Seeking a fresher software developer or AI/ML role.

EXPERIENCE

LegitMentoor, *Software Developer Intern | API Handler* 02/2026 – 07/2026
Managed REST API integrations, handled backend API operations, optimized data retrieval, performed API testing and debugging, and contributed to the development of secure and efficient legal technology solutions.

Samatrix AI&ML 06/2025 – 2025
Worked on real-world datasets to perform Exploratory Data Analysis (EDA) using Python libraries like Pandas, Matplotlib, and Seaborn to uncover patterns and insights. Gained hands- on experience in building and evaluating Machine Learning models using algorithms like Linear Regression, Decision Trees, and KNN.

PROJECTS

Indian Kanoon 02/2026 – 07/2026
- Integrated and managed the Indian Kanoon REST API to retrieve legal judgments, case laws, and court documents, ensuring accurate and efficient legal information access.
- **Technologies:** REST API | JSON | HTTP | Postman | Python/Node.js (as applicable) | API Integration | Error Handling | Backend Development

Edge-Optimized PCB Surface Defect Inspection Microservice 2026 – 2026
Python, FastAPI, ONNX Runtime, Docker, OpenCV
- Quantized YOLO backbone to INT8 via ONNX Runtime, cutting model memory by ~70% (12.5 MB to 3.8 MB) for edge CPU deployments.
- Engineered an async dynamic micro-batching queue in FastAPI, achieving a 4x throughput boost (48 FPS) and sub-35ms P95 latency.
- Built aspect-preserving letterboxing, an active-learning drift logging loop, and automated CI/CD using Docker and GitHub Actions.

Yaatri 2025 – 2025
- Yaatri is designed as a centralized tourism website that combines destination exploration, events, and tour planning in one place, solving the problem of fragmented travel information.
- The platform focuses on providing a seamless, visually appealing, and easy-to-navigate interface using modern web technologies (HTML, CSS, JavaScript, MongoDB) to enhance user engagement.

My Motivator 2026 – 2026
- Integrated with Groq API using a powerful LLM (llama-3.3-70b-versatile).
- Generates quick, context-based motivational replies.
- Each selection changes the AI's tone, style, and language using custom prompts.

Crateplay, *Game Store Website* 2026 – 2026
Node.js, JavaScript, REST APIs | crateplay.onrender.com | github.com/Rupeshkumawat/crateplay
- Built a full-stack game store with free games, cart, Wishlist and library features.
- Integrated live Steam and Cheap Shark data through a Node.js backend to power a PC-compatibility checker and game price history.
- Deployed the application on Render and published the source code on GitHub.

SKILLS

- Programming Languages: Python, Java, C, C++, JavaScript, TypeScript, R
- Tools and Cloud: Git, GitHub, Docker, AWS, SonarQube
- Web and Backend: React.js, Node.js, Flask, Django, REST APIs, HTML, CSS
- Core Concepts: ETL, Computer Networks, Data Structures
- Databases: PostgreSQL, MongoDB, Redis
- Data Science and Machine Learning: Pandas, Matplotlib, Seaborn, NLP, TF-IDF, Linear Regression, Logistic Regression, Decision Trees, KNN, Naive Bayes, RandomForest, IsolationForest, Exploratory Data Analysis

EDUCATION

Bachelors of technology Computer science, *JECRC University* 2022 – 2026 | Jaipur, Rajasthan

Secondary, Senior Secondary School, *Defense Academy school* 2019 – 2022 | Jaipur, Rajasthan

CERTIFICATES

- R-programming
- Deep learning
- Machine learning
- NLP
- DSTT
